SPANDX

DRAFT DESIGN

Basically gonna explain this initial design and what each variable does etc and probably a brief explanation of what our concept actually is just in case users miss the other more informative poster and the brochures.

projector does this, kinect does that, our program teaches kids about space etc.

FINAL DESIGN

This is where we are going to briefly explain how we got to this point, how this design was chosen, what intentions were considered, why we moved some of the variables around etc.

The projector was moved to the bottom of the table so that the graphics projected on the spandex surface wouldn't get obstructed by users interacting with it.
